

Ideation Phase

Define the Problem Statements

Date	27 June 2026
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

I am	I'm trying to	But	Because	Which makes me feel
a Food Delivery Platform Manager	understand food ordering behaviour and consumer trends to improve services, offerings, and customer satisfaction	it is difficult to identify key patterns in ordering habits, preferences, and trends from raw data	ordering behaviour is influenced by multiple factors like cuisine preference, time, location, price, offers, rating, and past orders, making analysis complex	uncertain about decision-making and worried about losing customers and growth opportunities

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A food delivery app user	choose suitable food based on taste, price, and preference	I get too many options and struggle to decide quickly	apps display large menus without clear personalization or prioritization	confused and sometimes delay or skip ordering
PS-2	A frequent online food customer	get better food recommendations and smooth ordering experience	recommendations are often not relevant and delivery experience is inconsistent	customer behavior is not fully analyzed and delivery systems vary by restaurant load and location	dissatisfied and less confident in ordering again
