

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	28 June 2026
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Google Account
FR-2	User Authentication	Login using Email and Password ,Password Recovery via Email
FR-3	Food Search	Search food items by name Filter restaurants by category, rating, and location
FR-4	Food Ordering	Add food items to cart Place online food orders Track order status
FR-5	Consumer Behaviour Analysis	Analyze customer ordering behaviour Analyze food preferences and purchasing patterns
FR-6	Food Recommendation	Recommend personalized food items Suggest popular restaurants based on user preferences
FR-7	Feedback Management	Submit customer reviews and ratings Analyze customer feedback
FR-8	Report Generation	Generate consumer behaviour reports Export reports in PDF or Excel format
FR-9	Administrator Management	Manage users, restaurants, menus, and customer orders
FR-10	Machine Learning Prediction	Predict consumer food preferences and identify ordering trends

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Provides an easy-to-use and user-friendly interface for customers and administrators.
NFR-2	Security	Ensures secure authentication, password encryption, and protection of customer information.
NFR-3	Reliability	Generates accurate consumer behaviour analysis and recommendation results.
NFR-4	Performance	Provides fast food search, recommendation generation, and order processing.
NFR-5	Availability	System is available 24×7 with cloud-based hosting and database backup.
NFR-6	Scalability	Supports increasing numbers of customers, restaurants, food items, and orders.
NFR-7	Maintainability	Allows easy updates to menus, datasets, recommendation models, and application features.
NFR-8	Compatibility	Supports major web browsers and mobile devices for seamless access.
